

-----crear proyecto

```
composer create-project laravel/laravel tienda
```

-----crear db

```
sudo -u postgres createuser -P tienda
```

```
sudo -u postgres createdb -O tienda tienda
```

-----conexión a la base de datos

```
psql -h localhost -U tienda -d tienda
```

```
composer install
```

```
npm install
```

```
cambiar .env
```

```
php artisan migrate
```

-----instalación breeze

```
composer require laravel/breeze --dev
```

```
php artisan breeze:install
```

```
php artisan migrate
```

```
npm install
```

```
npm run dev
```

```
web.php
```

```
añadir los controladores
```

```
Route::resource('departamentos', DepartamentoController::class);
```

```
Route::resource('empleados', EmpleadoController::class);
```

```
y name ( 'home' ) ;
```

```

es > web.php > ...
<?php

use App\Http\Controllers\ProfileController;
use Illuminate\Support\Facades\Route;

Route::get('/', function () {
    return view('welcome');
})->name('home');

Route::get('/dashboard', function () {
    return view('dashboard');
})->middleware(['auth', 'verified'])->name('dashboard');

Route::middleware('auth')->group(function () {
    Route::get('/profile', [ProfileController::class, 'show']);
    Route::patch('/profile', [ProfileController::class, 'update']);
    Route::delete('/profile', [ProfileController::class, 'destroy']);
});

require __DIR__.'/auth.php';

```

Import the Flowbite JavaScript package inside the `./resources/js/app.js` file to enable the interactive components such as modals, dropdowns, navbars, and more.

```
import 'flowbite';
```

tambien en el package.json

y en el tailwind.conf

-----ver tablas

layout navigation.blade.php

modificar el controller para que salga

```
class ArtículoController extends Controller
{
    /**
     * Display a listing of the resource.
     */
    public function index()
    {
        return view('articulos.index', [
            'articulos' => Artículo::all(),
        ]);
    }

    /**
```

tambien añadir controladores en la web.php
y ademas crear dentro de views articulos y luego el index.blade.php
